

Bug Lifecycle - All Stages

- **Bug Leakage** - Defect found by the customer or in production that was missed during testing.
- **Bug Triage** - Process of reviewing, prioritizing, and assigning defects based on severity, priority, and impact.
- **Bug Severity** - Degree of impact a defect has on the application's functionality.
- **Bug Priority** - Order in which a defect should be fixed based on business importance.

- **Defect Density** - Number of defects found per module or per size of the application.
- **Defect Aging** - Time duration a defect remains open before being fixed or closed.
- **Defect Slippage** - Defects that move from one test phase to the next without being detected.
- **Defect Backlog** - List of open defects pending fix or review.
